

Alexandr Sokolov

Data / BI Analyst · Data Quality · Master Data Management

Data / BI Analyst with 3+ years in FMCG and IT projects. I help business teams turn scattered operational data into reliable reporting, recurring checks, and documented processes. Strong in Power BI, SQL/Python data checks, Excel/VBA automation, SAP ERP context, and master data quality.

EXPERIENCE

Senior Master Data & Data Management Specialist

2024 - Present

LLC X-Tech, subsidiary of LLC UBH

- Improved master data accuracy by 25% through restructuring and automated audit routines.
- Automated recurring data and reporting processes with Python and VBA, saving about 15 hours/month.
- Contributed to Local MDM and SAP ERP integration as a domain expert: process descriptions, requirements, BRD materials, presentations, approvals, and communication with business users.
- Supported and trained 50+ BI users, helping reduce incidents caused by data misinterpretation.

BI Analyst

2022 - 2024

LLC UBH, Heineken structure

- Built 5 Power BI dashboards from scratch for commercial, marketing, and logistics teams.
- Reduced reporting preparation time by 30% with Python scripts and improved ETL routines.
- Participated in BI stack migration, validating data correctness across models and DWH layers.
- Conducted UAT for new data models before production release, aligning outputs with business requirements.

Backend Developer

2026

EdTech platform, short-term part-time / freelance project

- Worked with Node.js, NestJS, REST API, PostgreSQL, Git/GitHub, and GitHub Issues.
- Handled product and technical tasks from requirements analysis to implementation, testing, and code review participation.
- Worked with PostgreSQL data structures and SQL queries, gaining hands-on experience with modular NestJS architecture.

SELECTED WORK EXAMPLES

- Master data audit automation:** recurring checks for data consistency, reducing manual validation by about 15 hours/month.
- Commercial BI dashboards:** Power BI reports for commercial, marketing, and logistics teams from requirements to release.
- BI migration validation:** comparison of model outputs, DWH layers, and business expectations before production release.

CORE SKILLS

- Power BI dashboards, DAX, Power Query, Excel validation
- SQL queries, joins, subqueries, window functions
- Python/Pandas for reporting automation and data checks
- Data Quality, MDM, SAP ERP context, OpenMetadata
- Requirements gathering, BRD materials, UAT, stakeholder communication

TECHNOLOGY

Power BI DAX Power Query SQL Python Pandas Excel VBA PostgreSQL Node.js NestJS REST API SAP ERP OpenMetadata
MDM Git/GitHub

EDUCATION

Saint Petersburg State University of Economics

2017 - 2022

Specialist degree, Economic and Legal Support of Economic Security

Additional development: Data Governance fundamentals, MDM workshops, Advanced Power BI visualization, SQL for data analysis, Python reporting automation.
